

## BOAT FOR SALE

Here is your chance to buy one of the best day boats on the Thames, its 17ft long and 6ft beam, manufactured in Minorca, Spain in about the early 1990's.

Sadly we are selling the boat so we can buy a larger one to accommodate our five grandchildren.

The boat is fully licensed for use only on Thames until the end of the year and has a Safety Certificate until July 2022.

The hull is fibreglass and the Gel Coat is in good order, it has not been painted other than the red and blue stripes, and has wooden trim and hand rails, the hull was re-coated in anti foul in 2018

The engine is inboard 10hp diesel Beta Marine of Gloucester, it has been serviced on a regular basis, starts first time and has never let me down,

The steering was a tiller this has been replaced with brand new helm and steering cables, the tiller is still on board and can be used in a emergency.

When I bought the boat it was a bare empty cabin, its been lined, insulated and fitted with brand new seating cushions and covers, so it could be used for the occasional over night stay.

The canopy, boom, mast and rear seat are all home made and I was going to replace with a professional made ones at a later date.

Boat can be viewed at Radcot, near Farringdon, Oxfordshire give us a ring on 07771651400 if I don't answer please leave a message and I will get back to you.
